Your Benefits

Covering the full range of printing applications, our flexo tools are specifically designed to meet your quality and cost requirements. To meet your demands, our plates provide perfect reproduction by using the latest imaging techniques, combined with tailored reprographic and accurate color management. We will help you achieve results comparable to gravure printing.

If you are looking for advantages in terms of handling and efficiency, our photopolymer and elastomer sleeves will perfectly fulfil your needs for seamless printing. All of your unique specifications, such as machinery and color management, are taken into consideration during mold production, which guarantees precision and allows for an improved ink transfer.
