

**Kippenheim, 26. September 2013. This year's Daetwyler Laser User Meeting held on September 19/20 had its kick-off at the Janoschka production site in Kippenheim. A company visit including live demos was a great introduction into the meeting focus, namely pulse fiber laser and acid zinc.**

The yearly Laser User Meeting hosted by Daetwyler is meeting point for the industry, experience exchange and innovation report likewise. As market leader in machine building for the printing industry and competence center for unique laser engraving systems, Daetwyler Graphics AG invites reputable prepress market players within the packaging, decor and illustration printing industry for a trade exchange.

The meeting kick-off was held at Janoschka Kippenheim operating seven laser machines in total for different imaging processes. Janoschka Kippenheim produces 40.000 gravure cylinders per year, of which more than 11.000 laser cylinders for rotogravure and embossing. Janoschka installed its first direct laser machine in Kippenheim back in the year 2000.

Worldwide Janoschka is supplying different laser technologies out of seven production sites to its customers, and is the single prepress partner on the market offering all laser technologies currently available.

Janoschka's experiences with Helio-Zinc and the beta test machine at Kippenheim made this topic very lively as well.

Your contact for both topics at Janoschka is Ralf Zähringer, project manager new technologies, Tel 49 7825 849 429.
